### **DETAILED ACTION**

**Claims 1-11 and 13-21 are pending.**

#### ***Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7 and 13-21, drawn to a compound of formula I where X= an imino group, a method for protecting human skin and hair, and a composition comprising one or more compounds of formula I.

Group II, claims 1-7 and 13-21, drawn to a compound of formula I where X= an oxygen, a method for protecting human skin and hair, and a composition comprising one or more compounds of formula I.

Group III, claims 8-11, drawn to a polysiloxane of formula II, where X= an imino group.

Group IV, claims 8-11, drawn to a polysiloxane of formula II, where X= an oxygen.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is a benzene ring. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in prior art. US Patent 5,639,446 teaches derivatives of benzoxazole useful as sunscreens in cosmetics. The invention of the instant application lacks a special corresponding technical feature and does not make a contribution to the prior art. Therefore, the claims cannot be said to have unity of invention.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
